Gentlemen – See attached for the slide deck I will use to facilitate the MAC meetings on Thursday mornings. Any updated aerials/imagery which will help explain the updates is always welcome. I just put some of the shots from the FD in there for now and labelled them up. Let me know if you'd like any other images in there or you can always take control of the screen and show photos if you'd like.

Subject: Outline for weekly MAC Updates

Morning Joe & Cory –

Here is a proposed outline for the 'updates' we'll be looking for from the company on the weekly Multi-Agency Coordination Group calls (Tony – reply to all if you'd like to see anything more):

- On-site assessment / cleanup status
 - Off-site assessment / cleanup status (i.e., # hotline operators, response teams, calls, consults, homes assessed, homes cleaned)
- Contact water management (plans, schedule)
- On-site monitoring activity / results (air, water)
- On-site and off-Site sampling data (wipes, soil, waste)
- Press/communications

I am attaching an example set of slides from a fire last fall up north in Menominee, Michigan to give you an idea of how the meetings will flow. I will keep these to 30 minutes, so try to limit updates to only a couple minutes max on each topic.
